SPARK (FORMERLY ATA)

SPARK develops education and entrepreneurship so that young and ambitious people are empowered to lead their post-conflict society into prosperity. We build the capacity of local economic and educational institutions so they can empower their own populations. The organisation actively mobilises support for this within Dutch Society, especially with economic and educational institutions.

TE FALA

Students from Kosovo participated in the regional business plan competition with their project "Te Fala". "Te Fala" project aims to create an online platform which will enable Albanians worldwide to place an order online and consequently establish closer ties with their families at home by sending gifts. Introducing this service, the business project will fulfil the needs of Albanians who lives abroad to feel closer to their families by means of gifts and care, even when they are not physically beside them.

Mr. Driton Nikaj, the leader of the "Te Fala" stated that he wanted to challenge himself and establish his own company. This business will give him the opportunity to implement and manage his business ideas, to generate new jobs and to be more financially independent.
